Task Description	Predecessor	Duration	Start Week	Task ID
Define problem, objectives, and scope	None	1	1	A
Define system requirements and acceptance criteria	A	1	2	B
Create GitHub repository and initial Gantt chart	A	1	2	C
Select technologies and prepare trade-off matrix	A,B	1	3	D
Create system architecture and data-flow diagrams	B,D	1	4	E
Set up Python and run a pretrained YOLO model	A	1	3	F
Prepare and label a safe target dataset	F	2	4	G
Fine-tune YOLO and evaluate detection performance	F, G	2	5	H
Set up the selected robot simulation	D	2	4	I
Implement basic waypoint movement and obstacle tests	I	2	5	J
Record detections and visualize them on a map	F, I	2	6	K
Integrate the core modules and resolve major issues	H, J, K	1	7	L
Run feasibility tests and collect results	H, J, K	1	7	M
Complete the proposal and technical documentation	E, M	1	8	N
Prepare and deliver the final presentation	M, N	1	8	O
